

**AcmeiMet™**  
Power of Protection

## Introducing metal packaging products

A highly engineered, specially formulated multilayered coated woven fabric designed to protect your valuable products from getting damaged or corroded while in transit. This specially engineered blend is UV resistant, is easy to handle and offers high tensile and tear strength. Available in two versions AcmeiMet™ Heavy & AcmeiMet™ Lite to last through all your transporting needs by either road or water.

For automatic coil wrapping, we offer AcmeiCoil Wrap™ coated woven metal wrap utilizing advanced MVS ACMEI technology. It provides a far superior and cost efficient packaging solution as compared to VCI stretch film alone.

Formulated through our patented VCI technology, AcmeiMet™ ensures that your products do not undergo any oxidation when they come in contact with air & water.

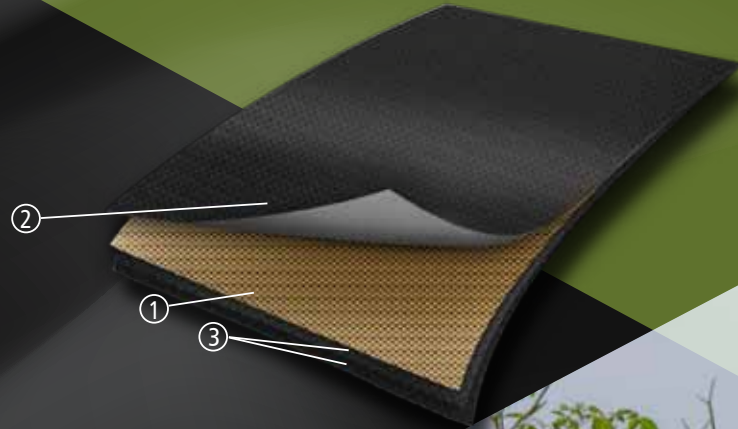

## AcmeiMet Heavy™

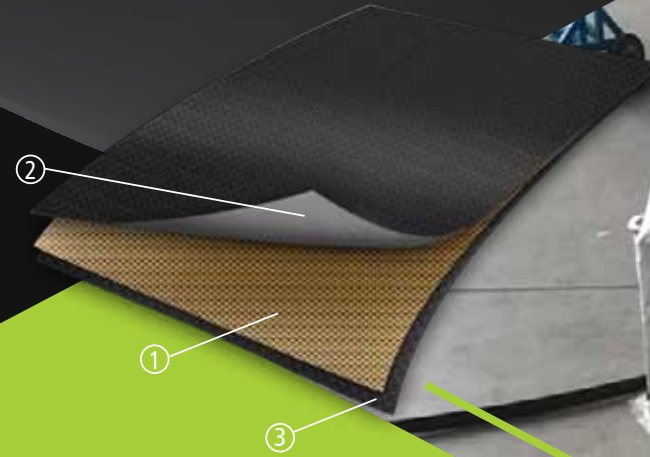

### Features & Benefits

- Available in four layers with a special layer of premium kraft paper or hydrophilic non-woven
- The kraft paper or hydrophilic non-woven layer has the ability to absorb any water on the product ensuring zero corrosion
- The patented VCI technology further ensures that your metal remains moisture proof
- The woven scrim provides excellent tear resistance protecting the fabric from tearing through the edges of both the coil and cut to length sheet
- Available in width up to 4 meters
- Allows Up to four color logo printing
- UV stabilized giving outdoor life of more than a year
- Two versions 150 grams per square meter & 180 grams per square meter ensure that we have your needs completely covered
- VCI life 6 to 8 months

1. High Strength Woven Scrim
2. Engineered Extrusion Coating
3. Kraft Paper or Hydrophilic Non - woven

1. High Strength Woven Scrim
2. Engineered Extrusion Coating
3. Undergrade Kraft Layer Paper With Special Protective Coating

## AcmeiMet Lite™

### Features & Benefits

- All poly three layered product and hence 100% recyclable
- Formulated by patented VCI technology which further ensures that your metals remain moisture proof
- The woven scrim provides excellent tear resistance protecting the fabric from tearing through the edges of both the coil and cut to length sheet
- Available in width up to 4 meters
- Allows up to four color logo printing
- UV stabilized giving outdoor life of more than a year
- Two versions 100 gms per square meter & 125 gms per square meter ensure that we have your needs completely covered
- VCI life 12 to 18 months

## AcmeiCoil Wrap and AcmeiVCI Wrap

### AcmeiCoil Wrap™

For automatic coil wrapping, we offer AcmeiCoil Wrap™ coated woven metal wrap utilizing MVS ACMEI advanced technology. It provides a far superior and cost effective packaging solution as compared to VCI stretch film alone. Offered in a variety of widths and roll lengths and can be custom printed which is not feasible with VCI stretch film.

Specially designed for automatic wrapping machines with unique formulation ensuring tear proof and air tight technology thereby eliminating any chance of corrosion. This product is available in 4 inch width for slit coil wrapping machines & 7.5 inch for through the eye wrapping machines. It is formulated through patented VCI technology ensuring extra protection against corrosion.

### AcmeiVCI Wrap™ protection for metal

AcmeiVCI™ is a patented formulation which ensures that your product remains oxidation proof by forming a uniform layer over the product ensuring product safety. We supply two varieties of VCI :

#### Liquid VCI

- Used on paper and non-woven substrate
- Acts very quickly
- Life of 6 to 8 months

#### VCI granules

- Used with all poly products
- Acts steadily
- Life of 12 to 18 months
